The SWC-R SERIES is a custom brake-formed wall cap that permits the introduction of a recessed reveal of variable depth and width onto the top of gypsum divider walls. This allows the replacement of wood handrails in cases where high traffic and durability are a factor. The cap can be painted to match the color of the wall or in a complimentary color using the recessed reveal as a divider. Screws through the grooved fins must always engage with metal or wood substructure to ensure proper installation.

MATERIAL: Aluminum alloy.....3003 H-14 or equal
Finish.....Factory primed
Metal thickness......062" typical

SWC-212R-2 (Shown) CUSTOM WALL CAP
NO SCALE W/ 1/2" REVEAL
