Fax: (301) 699-8690	Fax: (602) 233-9400

The extruded aluminum profile shall incorporate a continuous integral fin for surface contact to conventionally installed gypsum drywall. The fins shall be 7/8" wide and shall be tapered to the edge. The tapered fins shall be punched with holes staggered to accept standard screw fastening. A series of continuous grooves shall be extruded into the face of the fins to provide greater bonding surface. The extruded profiles shall be primed with corrosion-resistant primer compatible with materials normally in use in conjunction with commercial interiors, i.e.: joint compound, latex and enamel paints, and wall covering adhesives.

MATERIAL: Aluminum alloy.....6063 T5 or equal
Finish.....Factory primed

EXAMPLE DETAIL

For use with conventional metal stud construction and 1/2" or 5/8" GPDW.

Metal studs at corner conditions will allow the SO SERIES of outside corner to work with the standard metal track. Optional ceiling trims for acoustical tile support are available in either a pre-finished white or primed for field finishing. Screws through the grooved fins must always engage metal or wood substructure to ensure proper installation.
