The SWCR-358-8 is an decorative aluminum wall cap that permits the capping of gypsum divider walls. A stepped reveal on either side of the top gives the wall cap a distinctive designer flair. It can also be used to create a monolithic appearance to drywall at passageways or openings which require no other trim. This is especially useful in areas where high traffic and durability are a factor. Screws through the grooved fins must always engage with metal or wood substructure to ensure proper installation.

MATERIAL: Aluminum alloy.....6063 T5 or equal
Finish.....Factory primed

SWCR- 358-8
NO SCALE

WALL CAP
SECTION

EXAMPLE DETAIL

For use with conventional metal stud construction and 5/8" GPDW.

Shown at left is a typical wall cap installation on a knee wall. For information concerning our SKB knee wall braces, see page SR-21.
