Fax: (301) 699-8690	Fax: (602) 233-9400

The formed aluminum profile shall incorporate a continuous integral fin for surface contact to conventionally installed gypsum drywall. The swedged fins shall be 1-3/8" wide nominally, with a raised shoulder for taping and spackling to. The formed profile shall be primed with a corrosion-resistant primer compatible with materials normally in use in conjunction with commercial interiors, i.e.: joint compound, latex and enamel paints, and wall covering adhesives. Screws through the installation fins must always engage wood or metal substructure in order to ensure proper installation.

MATERIAL: Aluminum alloy.....3003 H-14 or equal  
 Finish.....Factory primed  
 Thickness......090" Typical

### EXAMPLE DETAIL

For use with conventional metal stud construction and 1/2" or 5/8" GPDW.

The SB-LDP is a large diameter bullnose or column cover with two perpendicular fins for drywall constructions similar to that depicted here. Screws through the installation fins must always engage metal or wood substructure to ensure proper installation.
