The extruded aluminum profile shall incorporate a continuous integral fin for surface contact to conventionally installed gypsum drywall. The fins shall be 7/8" wide and shall be tapered to the edge. The tapered fins shall be punched with holes staggered to accept standard screw fastening. A series of continuous grooves shall be extruded into the face of the fins to provide greater bonding surface. The extruded profiles shall be primed with corrosion-resistant primer compatible with materials normally in use in conjunction with commercial interiors, i.e.: joint compound, latex and enamel paints, and wall covering adhesives.

MATERIAL: Aluminum alloy.......6063 T5 or equal Finish.....Factory primed

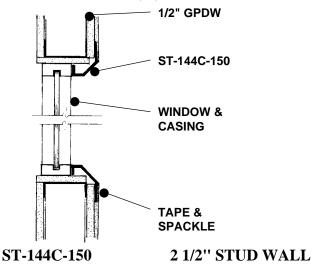

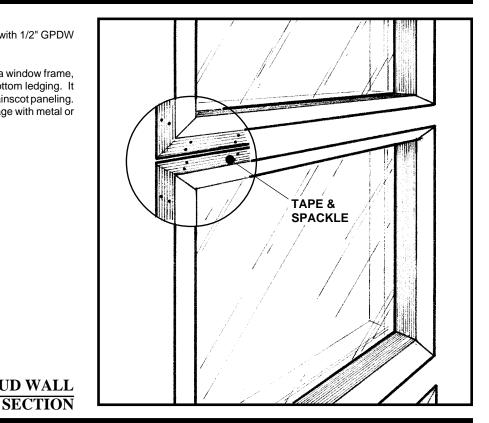

ST-144C-150 NO SCALE TRIM/WAINSCOT CAP SECTION

#### **EXAMPLE DETAIL**

For use with conventional metal stud construction with 1/2" GPDW only.

The ST-144C-150 may be used to trim out around a window frame, eliminating the need for both GPDW edges and bottom ledging. It may also be used as a cap to terminate the top of wainscot paneling. Screws through the grooved fins must always engage with metal or wood substructure to ensure proper installation.

All details, methods and specifications are the exclusive property of Pittcon Softforms® LLC. Pittcon reserves the right to change any specifications or details without prior notification. All Softforms® profiles are available in standard 10' lengths  $\pm 1/8$ " (2.048 M). Other lengths are available as special order items. For custom shapes, sizes, or for special finishes, please contact the factory or your nearest Pittcon sales representative.
